CUSTOMER SATISFACTION

We understand that every site and organisation is different, which is why we deliver a bespoke service tailored to the specifics of each individual site. As well as conducting detailed surveys of every site at the start of every contract, we agree road surface trigger temperatures that are appropriate to the location.

OUTCO offers clients the choice between fixed-cost winter gritting services, cost per visit winter gritting services or a bespoke hybrid pricing model.

EXPERIENCE THE OUTCO DIFFERENCE; WHERE QUALITY, RELIABILITY AND CUSTOMER SATISFACTION COME FIRST.

EXPERIENCE A SMARTER, MORE CONVENIENT SERVICE

At OUTCO we have pioneered the use of data and technology in winter maintenance to increase accuracy and efficiency of our gritting services, and to make our clients' lives easier.

Powered by our bespoke NIMBUS platform, we activate ice and snow clearance using location-specific forecast modelling built on the most accurate and timely road surface temperature data available. This allows us to automatically trigger site visits according to temperature and site conditions with a very high level of precision and accuracy.

REAL-TIME REPORTING

Clients have 24/7 access to all their service data via our customer portal with updates provided in real-time, which also provides data for compliance monitoring and reporting. So, no matter how bad the weather gets, you'll always have perfect visibility and lasting peace of mind.

When working on site, our operators use advanced mobile technology incorporating our own in-house telematics platform (PULSE) to track their precise location and activity, providing OUTCO with a 360-degree view of all operations.

WE HELP SAVE YOU MONEY,  
AND THE ENVIRONMENT, WITH  
A SUSTAINABLE APPROACH

At OUTCO we believe in a responsible and sustainable philosophy. Our data-driven approach ensures that we only grit when its needed, saving our clients the financial and environmental costs of unnecessary gritting. We primarily use white marine salt, a de-icing agent sourced from evaporated

seawater that is highly effective, clean, and from a sustainable source unlike mined brown salt. White salt is also more concentrated, making it a faster acting and more effective de-icer without leaving unsightly residues that can stain buildings, mark vehicles and damage carpets.
